INDEX TO AGRICULTURAL ENGINEERING

Volume 27—January to December, 1946

Issue	Pages
JANUARY	1- 48
FEBRUARY	49- 96
MARCH	97-144
APRIL	145-192
MAY	193-240
JUNE	241-288
JULY	289-336
AUGUST	337-384
SEPTEMBER	385-440
OCTOBER	441-488
NOVEMBER	489-536
DECEMBER	537-584

This is a combined alphabetical index to the contents of AGRICULTURAL ENGINEERING by authors, regular features, professional interests, and subject matter, including plants and animals concerned, materials, machines, processes, structures, and key words in titles.

A

ACCIDENTS, Farm (See Safety)

AGRICULTURAL ENGINEERING
(Agricultural Engineers)
- The challenge of today (editorial) 59
- Professional agricultural engineering service for farmers 80
- Training agricultural engineers to meet today's challenge 112
- What is an "agricultural engineer" (letter) 162
- Professional agricultural engineering service for farmers (letter) 216
- Engineering-management relationships (editorial) 299
- Agricultural engineering postwar 301
- Professional agricultural engineering service for farmers (letter) 323
- Some engineering implications in agricultural industries and services 347
- Whither agricultural engineering education 453
- The place of the agricultural engineer in the Missouri River development 562
- Agricultural engineering opportunities in farm management consultation 567
- "Professional" and "service" ag engineers 572

AIR CONDITIONING
(See also Ventilation)
- A 5-year summary of dairy barn research 499
- Physiological backgrounds for psychroenergetic studies 514

Anderson, Harold
- Seven years of hay drying experience 164

Anderson, K. E.
- Ground water in agriculture: I. Ground water in Missouri 465

Anderson, K. W.
- Hydraulic controls for farm implements 355

Animal psychronenergetic laboratory, The 472

Architectural service to farmers, A professional 559

Arnold, Earl L.
- What is an agricultural engineer? (letter) 162

Ashby, Wallace
- USDA farm buildings and rural housing activities 471

AWARDS (See Medalists)

B

Baggette, Thomas L.
- Flame cultivation and other mechanization of cotton in the Yazoo-Mississippi Delta 411

Berns, H. E.
- Safeguarding machinery to reduce farm accidents (letter) 572

Brody, Samuel
- Physiological backgrounds for psychroenergetic studies 514

Brooks, F. A.
- Engineering's economic environment (letter) 262

Brown, O. A.
- A machine for harvesting sweet potato vines 303

Brush control with heavy machinery 458

BUILDINGS, Farm (See Structures)

Bulkheads for outlet protection, Concrete 459

Burress, Charles G.
- Deep wells and farm ponds (letter) 473

C

Carnes, A.
- Agricultural drainage and land use problems in the southeastern region 74

Carreker, John R.
- Proper cropping practices strengthen terraces on sloping ground 311

Carter, Deane G.
- The needs of a farm structures program 123

Castor bean, Engineering the 157

Chapman, Paul W.
- Some engineering implications in agricultural industries and services 347

Chemicals, Weed control with 506

Chore jobs, Engineering farm 77

Cleaver, Thayer
- Forced drying of farm crib with heated air 426

Clyde, Arthur W.
- Distribution of air in long hay 159

Clyde, George D.
- Farm irrigation investigations and research in the seventeen western states 461

Collins, E. V. (The 1946 Deere gold medalist) 325

Combines to open grain fields, Self-propelled 261

Cones, Thelma Y.
- Moisture losses of vegetables during steaming, quick freezing, and packaging 263

CONSERVATION, Soil and Water
(See also Drainage, Erosion Control, Hydrology, Irrigation, Soils)
- Flood control aspects of farm ponds 9
- Application of stream gaging to the agricultural use of small streams and ponds 26
- Saving the good earth 67
- Small machines for removing trees and brush 305
- Row grades and row layouts for bright tobacco fields 313
- Why not more deep wells and fewer ponds? (letter) 366
- Ag engineers in watershed control 397
- Agricultural-engineering problems in watershed planning 403
- Ground water in agriculture: I. Ground water in Missouri 465
- Deep wells and farm ponds (letter) 473
- Ground water in agriculture: II. Ground water in Utah 518
- A state conservation research program 570

Copley, T. L.
- Row grades and row layouts for bright tobacco fields 313

Cotton harvesting, Late developments in mechanical 321

Cotton in Yazoo-Mississippi Delta, Flame cultivation and other mechanization of 411

Cox, Maurice B.
- Small machines for removing trees and brush 305

Cranage, Thomas
- Analysis of types of fans for curing hay in the mow 509

Cykler, John F.
- Effect of variations in available soil water on yield and quality of potatoes 363

D

Dairy barn research, A 5-year summary of ... 499

Dam design, Preliminary engineering studies for ... 415

Davidson, J. Brownlee
Farm power ... 131

Dawson, J. E.
Respiration in hay as a source of heat for barn drying partially cured hay ... 565

DEHYDRATION, Natural and Artificial (See also Drying)
The mechanical features of farm dehydrators ... 14
Drying ear corn in farm cribs by natural ventilation ... 425
Forced drying of a farm crib with heated air ... 426

DRAINAGE, Land
(See also Hydrology)
Agricultural drainage and land use problems in the southeastern region ... 74
Some factors affecting mole drains ... 316
Concrete bulkheads for outlet protection ... 459
Agricultural drainage — problems and needs ... 554

DRYING (Driers)
(See also Ventilation)
Factors controlling the rate of moisture removal in barn hay-curing systems ... 109
A forced ventilation hay drier ... 113
Factors affecting the nutritional value of forage plants ... 117
Calculating fan, motor, and duct requirements ... 121
Farm pressure for hay-drying progress (editorial) ... **157**
Distribution of air in long hay ... 159
Equipment for handling partially cured hay ... 163
Seven years of hay drying experience 164
Operation of hay driers in Virginia 166
Curing hay in the stack with forced air ... 167
Resistance of hay to air flow and its relation to design of barn hay-curing equipment ... 169
Air flow in drying baled hay with forced ventilation ... 203
Observations on the resistance of hay to air flow ... 209
The distribution of air through chopped hay ... 213
Problems in handling damp hay ... 214
Air flow in the main duct of a barn hay-drying system ... 217
Progress report on comparing the efficiency of three methods of harvesting and preserving forage crops 219
Analysis of types of fans for curing hay in the mow ... 509
What makes the mow hay drier work? (letter) ... 517
Forced air flow in drying hay ... 519
Respiration in hay as a source of heat for barn drying partially cured hay 565

Duffee, F. W.
The distribution of air through chopped hay ... 213

Dynamometer, A mule testing ... 550

E

Eames, Richard
Small machines for removing trees and brush (letter) ... 349

EDITORIALS
Equities in ponds ... 7
Can costs be interesting? ... 7
Impact of interest ... 7
The challenge of today (J. Dewey Long) ... 59
Salute to the schoolmaster ... 59
The Purdue papers ... 107
The harvester research center ... 107
Prefabrication vs. inflation ... 107
Engineering the castor bean ... 157
Farm pressure for hay-drying progress ... 157
Engineering's economic environment 157
Progress via teaching route ... 201
The St. Louis meeting ... 201
Farm work simplification ... 201
Agricultural engineers and farm safety ... 251
Built-in mechanical safety ... 251
Cooperation in research ... 251
Psychroenergetic research ... 299
Engineering management relationships 299
Responsibility to agriculture ... 345
The perennial data book question ... 345
A dynamic approach ... 397
Ag engineers in watershed control ... 397
Family farm opportunity ... 397
Engineering in the world's workshop 451
Engineering in merchandising ... 451
Engineering in farm safety ... 497
Correcting a misunderstanding ... 497
The airplane as farm equipment ... 545
Service agricultural engineers ... 545

Edminster, T. W.
A state conservation research program ... 570

Education, Industry requirements of professional A-E (letter) ... 406

Education, Whither agricultural engineering ... 453

Efficiency, A coordinated design of farmstead structures for improved ... 399

Egg cooling, The application of mechanical refrigeration to ranch ... 69

ELECTRIFICATION, Rural
(See also Refrigeration)
Lamps of tomorrow ... 19
Imagineering—radiation on the farm of tomorrow ... 33
Electric ventilation of poultry houses 61
Engineering farm chore jobs ... 77
Home uses for electric service ... 317
Ultraviolet radiation kills air-borne bacteria ... 322
Vitamin D potency of germicidal radiation ... 369

Engineers, A proposed national spokesman for ... 177

EROSION CONTROL, Soil
(See also Hydrology, Soils)
Stream bank erosion control ... 407

Everett, C. E.
Self-propelled combines to open grain fields ... 261

F

Fan, motor and duct requirements, Calculating ... 121

Fans for curing hay in the mow, Analysis of types of ... 509

Flame cultivation and other mechanization of cotton in the Yazoo-Mississippi Delta ... 411

Float meter for concrete pipe irrigation system outlets, A ... 228

Flood-control aspects of farm ponds ... 9

FOOD PROCESSING
(See Refrigeration)

Forage plants, Factors affecting the nutritional value of ... 117

Foss, Edward W.
"Professional" and "service" ag engineers (letter) ... 572

Frudden, C. E.
Factors controlling the rate of moisture removal in barn hay-curing systems ... 109

G

Gallagher, H. J.
Engineering farm chore jobs ... 77

Giese, Henry
Regional cooperation in farm building research ... 568

Grain bin floors, Storage performance of ... 357

Greene, John M.
Some rotary tillage applications ... 175

Grohskopf, J. G.
Ground water in agriculture: I. Ground water in Missouri ... 465

Gross, E. R.
Salute to the schoolmaster (letter) 133

Ground water in agriculture: I. Ground water in Missouri 465

Ground water in agriculture: II. Ground water in Utah 518

Ground water for irrigation in Georgia 521

Guelle, C. E.
A new sugar beet harvester 552

Guillou, Rene
Forced air flow in drying hay 519

H

Hall, R. A.
Brush control with heavy machinery 458

Hamilton, C. L.
Engineering farm safety 253

Harper, Wesley A.
Trends in power controls for farm machines 350

Harrold, L. L.
Application of stream gaging to the agricultural use of small streams and ponds (letter) 268

Haswell, John R.
Deep wells and farm ponds (letter) 473

Hay as a source of heat for barn drying partially cured hay, Respiration in 565

Hay-curing systems, Factors controlling the rate of moisture removal in barn 109

Hay, Forced air flow in drying 519

Hay in the mow, Analysis of types of fans for curing 509

Hay drier, A forced ventilation 113

Hay-drying progress, Farm pressure for (editorial) 157

"Hay finisher", Call it 78

Hay making in the Nebraska sand hills 226

Heizer, E. E.
A 5-year summary of dairy barn research 499

Hendrix, Andy T.
A forced ventilation hay drier 113
Observations on the resistance of hay to air flow 209

Herrick, S. M.
Ground water for irrigation in Georgia 521

Hersh, Lloyd J.
What makes the mow hay drier work? (letter) 517

Hickok, R. B.
New hydraulic problems 76
Problems in agricultural hydrology 310

Hodgson, R. E.
Progress report on comparing the efficiency of three methods of harvesting and preserving forage crops 219

Hosterman, W. H.
Progress report on comparing the efficiency of three methods of harvesting and preserving forage crops 219

Hotbed, Winter storage of vegetables in the 268

Hydraulic controls for farm implements 355

HYDROLOGY (Hydraulics)
Installations for noting the water and thermal relationships in soils 21
Hydrology committee activities 36
Research in agricultural hydrology 68
New hydraulic problems 76
Area relationships that simplify the hydrologic design of small farm ponds 269
Problems in agricultural hydrology 310
Preliminary engineering studies for dam design 415

I

Imagineering—radiation on the farm of tomorrow 33

Industries and services, Some engineering implications in agricultural 347

IRRIGATION
A new portable field water meter and new furrow water meter 29
A new priming valve for portable siphons 31
A float meter for concrete pipe irrigation system outlets 228
Small irrigation in the United States 307
Effect of variations in available soil water on yield and quality of potatoes 363
Farm irrigation investigations and research in the seventeen western states 461
Comparison performances of metallic and plastic siphons for irrigation 469
Ground water for irrigation in Georgia 521

J

Johnston, C. N.
A new portable field water meter and new furrow water meter 29
A new priming valve for portable siphons 31
A float meter for concrete pipe irrigation system outlets 228
Comparison performances of metallic and plastic siphons for irrigation 469

Jones, T. N.
A soil sampler for pore volume studies 423

K

Kable, George W.
Electric ventilation of poultry houses 61
Call it "hay finisher" (letter) 78

Kaiser, W. G.
The 1946 McCormick gold medalist 325

Kelsey, C. W.
Rotary soil tillage 171

Kephart, L. W.
Weed control with chemicals 506

Kohler, Karl O., Jr.
Professional agricultural engineering service for farmers (letter) 323

Kranick, F. N. G.
Questions about farm buildings (letter) 179
Built-in mechanical safety (editorial) 251

Krimgold, D. B.
Area relationships that simplify the hydrologic design of small farm ponds 269
A point in management of scientific personnel 523

L

Lamps of tomorrow 19

Larson, L. F.
Haymaking in the Nebraska sand hills 226

Lehmann, E. W.
Curing hay in the stack with forced air 167

Lester, H. H.
Stream bank erosion control 407

Long, J. D.
The challenge of today (editorial) 59
Agricultural engineering postwar 300

Lorenz, F. W.
The application of mechanical refrigeration to ranch egg cooling 69

Lynes, W. S.
Why not more deep wells and fewer ponds? (letter) 366
Concrete bulkheads for outlet protection 459

M

MacDonald, H. A.
Factors affecting the nutritional value of forage plants 117

MACHINERY, Farm
(See also Tractors)
Haymaking in the Nebraska sand hills 226
Self-propelled combines to open grain fields 261
A machine for harvesting sweet potota vines 303
Small machines for removing trees and brush 305
Late developments in mechanical cotton harvesting 321
Small machines for removing trees and brush (letter) 349
Trends in power controls for farm machines 350

Hydraulic controls for farm implements ... 355

Flame cultivation and other mechanization of cotton in the Yazoo—Mississippi Delta ... 411

Brush control with heavy machinery ... 458

The development of sugar beet planting equipment ... 547

The mechanization of sugar beet harvesting ... 549

A sugar beet combine ... 551

A new sugar beet harvester ... 552

Management consultation, Agricultural engineering opportunities in farm ... 567

Management of scientific personnel, A point in ... 523

Manure loader design needed, Improved (letter) ... 227

McBirney, S. W.
The development of sugar beet planting equipment ... 547

McCalmont, J. R.
The animal psychroenergetic laboratory ... 472

McColly, H. F.
Small irrigation in the United States 307

McKnight, Ralph E.
Operation of hay driers in Virginia ... 166

Medalists (E. V. Collins, W. G. Kaiser) The 1946 A.S.A.E. Gold ... 325

Meter and new furrow water meter, A new portable field water ... 29

Miller, R. C.
Air flow in drying baled hay with forced ventilation ... 203

Missouri River development, The place of the agricultural engineer in the ... 562

Mole drains, Some factors affecting ... 316

Moses, Ben D.
The mechanical features of farm dehydrators ... 14

Musgrave, R. B.
Respiration in hay as a source of heat for barn drying partially cured hay 565
